

Cross Country Meet Scoring

Individual Score

Every runner earns an individual placement based on their speed. The individual placement is the BLUE number on the far left.

Team Score

Teams fielding at least 5 runners will also earn a team score. The team score is the RED number at the far right.

If a team has less than 5 runners, runners will earn a placement, but the team scoring skips over them. In this race, Jonathan Ho earned 4th place, but his team did not have at least 5 runners. Therefore he was skipped over in the team scoring. He has no red score.

Each team's first seven runners will receive a placement score. The first five finisher's of that team, places are added together to calculate the team score.

Places 6 and 7 are also very important. Their score serves as blocker, forcing the other teams to have higher team scores.

In this race, Gavin Borer took 10th place for teams. As Bellarmine's sixth finisher, his score isn't part of the team score. But all finishers behind him have a one point higher finishing place causing their team scores to be higher.

The winning team has the lowest total score. If two teams happen to tie, the winner is determined by the sixth runner's score.

For this meet, Bellarmine's top 5 runners finished 2nd, 4th, 5th, 6th and 7th. The team score is $2+4+5+6+7 = 24$. AN EPIC RESULT!
